

Student Research

Dylan Haenel
conducting research on
Lyme disease in the
Biology Lab at UNH.

Student Research

Joe Adams, working on his SURF project in San Salvador Island, Bahamas. Joe is creating video documentation of the natural history, including endangered species, in an effort to help establish the island's first national park.

Student Research

Jennifer Corwin & Jamie Wakeman in Freeport New York, collecting samples for their research on morphological differences between shark, ray, and skate fin/wing cartilage.

Student Research

Anna O'Malley & Jonathan Smolen with their mentor, Dr. Art Gow (Tagliatela College of Engineering), working on creating a new and more efficient equation of state (EOS) that chemical process engineers can implement in industrial applications.
